Vani Sharma

Boston, MA | +1 (857) 396-8591 | sharma.vani1@northeastern.edu | linkedin.com/in/vanisharma | Portfolio

Education

Northeastern University — **Boston, MA**
M.S., Biotechnology | GPA: 3.8/4.0 — *Expected Dec 2026*
Coursework: Biotechnology Enterprise, Biostatistics, R Programming, Healthcare Project Management

Manipal Institute of Technology — **Manipal, India**
B.Tech, Biotechnology | Minor: Environmental Biotechnology | GPA: 3.6/4.0 — *May 2024*
Coursework: Bioinformatics, Bioreaction Engineering, Environmental Biotechnology

Technical Skills

Product & Project Management: Agile, Scrum, sprint planning, backlog prioritization and milestone tracking, cross-functional coordination, external client coordination, stakeholder management, product roadmap planning, executive reporting, program dashboards; Jira, Smartsheet
AI & Technical Product: Large Language Models (LLMs), retrieval-augmented generation (RAG)
Clinical & Regulatory: ICH-GCP, SOP development and compliance, protocol and CRF review, regulatory documentation, clinical data validation
Data & Analytics: Python, SQL, R, Tableau, data cleaning, validation and trend analysis, statistical modeling
Laboratory & Domain: CRISPR gene editing, mammalian cell culture, PCR/qPCR, DNA extraction, Western blot

Work Experience

Technical Product Manager — **Aug 2025 – Present**
D'Amore-McKim AI Strategic Hub (DASH) — *Boston, MA*

- Led end-to-end execution of 6 concurrent AI products, coordinating engineering, research, and faculty teams while introducing dashboards and executive reporting that reduced review cycle time by 25%.
- Translated business needs into actionable requirements, user stories, acceptance criteria, and technical specifications across 8 development initiatives involving LLM integration, prompt optimization, embeddings, and RAG.
- Conducted competitive and market research across EdTech and AI platforms, identifying capability gaps, positioning opportunities, and customer needs to guide roadmap prioritization and go-to-market strategy.
- Designed QA frameworks, user acceptance testing, attention checks, and AI response evaluation protocols, increasing output reliability by 30 to 40% and strengthening release readiness.
- Standardized a 5-stage Agile workflow across development, testing, remediation, and production deployment, streamlining coordination among technical leads, faculty, developers, and end users.
- Automated a pipeline of 1,000+ contact records using validation and deduplication controls, enhancing data accuracy and establishing a reliable foundation for investor and partner outreach.
- Developed go-to-market strategies for AI-powered education products, defining target users, value propositions, competitive positioning, adoption pathways, and pilot opportunities to support university-level commercialization and stakeholder engagement.
- Drove R&D planning for AI product initiatives by translating client and user feedback into testable product features, coordinating experimentation with engineering teams, and evaluating technical feasibility to inform development priorities.

Research Associate — **Jun 2025 – Aug 2025**
Neoclease, Tufts Launchpad Biolabs — *Boston, MA*

- Introduced Kanban-based workflow tracking for research operations, increasing on-time experiment starts from 68% to 91% and boosting laboratory throughput by 34%.
- Established data quality and validation standards for AI/ML models using CRISPR cell and gene therapy datasets, ensuring genomic inputs were accurate, consistently structured, and suitable for downstream research analysis.
- Developed genomic data extraction pipelines that converted raw sequencing outputs into standardized, analysis-ready datasets, enabling classification and analysis of 100+ gene therapy datasets.

R&D Associate — **Jan 2024 – Aug 2024**
Beiersdorf Pvt. Ltd. (NIVEA) — *Mumbai, India*

- Spearheaded 3 GCP-aligned dermatological efficacy studies measuring TEWL, erythema, and pigmentation endpoints, maintaining data integrity to ICH-GCP standards and study SOPs.
- Managed documentation and cross-functional coordination across 4 product development workstreams from formulation through study close, keeping records audit-ready.
- Built Tableau dashboards tracking study progress and outcome metrics, turning raw efficacy data into decision-ready reporting for R&D leads.

Projects

Svastha (HealthVault) – Decentralized Health Data Platform — **Jun 2024 – Present**
Business Operations Lead

- Led business operations and go-to-market execution for an early-stage decentralized health data startup, driving commercialization, customer discovery, and strategic partnerships, contributing to the venture's selection into the Harvard Foundry program.
- Developed a comprehensive go-to-market strategy using market research to refine product positioning, value propositions, target segments, and messaging, resulting in a 40% increase in lead generation and qualified prospects.
