

Vani Sharma

Product & Program Management | Life Sciences & Biotech

Boston, MA | +1 (857) 396-8591 | sharma.vani1@northeastern.edu | [linkedin.com/in/vanisharma](https://www.linkedin.com/in/vanisharma)

SUMMARY

Biotech self trained product and program manager pairing wet-lab R&D (CRISPR, dermatological clinical studies) with delivery of AI-powered life-sciences and academic tools. Works towards Moving programs from stakeholder requirements to launch and turns scientific work into decision-ready reporting.

EDUCATION

Northeastern University

M.S., Biotechnology | GPA: 3.8/4.0

Coursework: Biotechnology Enterprise, Biostatistics, R Programming, Healthcare Project Management, Emerging Market Studies

Boston, MA

Expected Dec 2026

Manipal Institute of Technology

B.Tech, Biotechnology | Minor: Environmental Biotechnology | GPA: 3.6/4.0

Coursework: Bioinformatics, Bioreaction Engineering, Environmental Biotechnology

Manipal, India

May 2024

TECHNICAL SKILLS

Product & Program Management: Sprint planning, backlog and milestone tracking, cross-functional coordination, stakeholder management, executive reporting, program dashboards; Jira, Smartsheet

Clinical & Regulatory: ICH-GCP, SOP development and compliance, protocol and CRF review, regulatory documentation, clinical data validation

Data & Analytics: Python, SQL, R, Tableau; data cleaning and trending, statistical modeling, dashboard development

Laboratory & Domain: CRISPR gene editing, mammalian cell culture (HEK293T, K562), PCR/qPCR, DNA extraction, Western blot; dermatological efficacy endpoints (TEWL, erythema, pigmentation)

WORK EXPERIENCE

Product Manager

D'Amore-McKim AI Strategic Hub (DASH)

Jun 2025 – Present

Boston, MA

- Lead the overall delivery across 6 concurrent AI-product programs, owned and planned sprint planning, backlog, and dependency management to keep milestones on schedule against baseline plans.
- Built program dashboards and executive reporting templates adopted across the hub, giving leadership early visibility into risks and shortening the reporting cycle for delivery reviews.
- Lead the partnership with Sanara Healthcare into technical specs and validation criteria, aligning 4 stakeholder groups on scope for an ICU Simulator for aiding EHR documentation for doctors.
- Automated a 1,000+ record contact pipeline in RocketReach and added validation checks, cutting duplicate and invalid entries to raise dataset accuracy for reaching out to investors and helping overall increase visibility.

Research Associate

Neoclease, Tufts Launchpad Biolabs

Jun 2025 – Aug 2025

Boston, MA

- Introduced Jira Kanban to research operations, lifting on-time experiment starts from 68% to 91% and raising lab throughput 34%.
- Set data-quality and validation standards for AI/ML models applied to CRISPR cell and gene therapy datasets, ensuring inputs met clinical-grade structure for downstream analysis.
- Built genomic data-extraction pipelines that produced analysis-ready datasets for gene-therapy classification, standardizing how the team handled sequencing outputs.

R&D Associate

Beiersdorf Pvt. Ltd. (NIVEA)

Jan 2024 – Aug 2024

Mumbai, India

- Ran 3 GCP-aligned dermatological efficacy studies (n≈120) measuring TEWL, erythema, and pigmentation endpoints, maintaining data integrity to ICH-GCP standards and study SOPs.
- Managed documentation and cross-functional coordination across 4 product development workstreams from formulation through study close, keeping records audit-ready.
- Built Tableau dashboards tracking study progress and outcome metrics, turning raw efficacy data into decision-ready reporting for R&D leads.

PROJECTS

[Svastha \(HealthVault\)](#) — Decentralized Health Data Platform

Jun 2024 – Present

Business Operations Lead

- Led business operations and go-to-market for an early-stage decentralized health-data startup, earning selection into the Harvard Innovation Labs (Foundry) accelerator.
- Ran market and competitive analysis across the health-data landscape to size the opportunity, define target segments, and shape the product roadmap.
